__init__.py — technical

`src/moe_pruning/models/switch_transformers/__init__.py · 18 lines · moe_pruning.models.switch_transformers.__init__`

Purpose

Importing this package registers `ModelPlugin(name='switch_transformers', model_types=('switch_transformers',), adapter_factory=SwitchTransformersAdapter, task_factory=Seq2SeqDenoisingTask, auto_model_class=AutoModelForSeq2SeqLM)`. `load_plugins()` imports it automatically.

Module constants

Name	Value
`PLUGIN`	register_plugin(ModelPlugin(name='switch_transformers', model_types=('switch_transformers',), adapter_factory=...
