logging.py — technical

`src/moe_pruning/utils/logging.py · 22 lines · moe_pruning.utils.logging`

Purpose

`setup_logging`: stream + optional file handler, format `time | level | logger | message`, `force=True` to replace earlier configuration; urllib3/httpx/huggingface_hub/datasets/filelock/fsspec at WARNING, transformers at ERROR; macOS torch redirect warning filtered.

Step by step

Classes and functions in source order. Signatures, line ranges, raised exceptions and settings are extracted from the code; numbered steps describe what the code does.

`setup_logging`

```
def setup_logging(level: str='INFO', log_file: Path | None=None) -> None
```

lines 12-22

Console + file logging; quiet third-party loggers.
